

Transportation Emergency Rescue Committee

CANADA

112 Adelaide St.,
Seeleys Bay, On K0H 2N0

The overall mission of TERC Canada is to serve as a competent source of guidance and information to those responsible for providing emergency services at transportation related emergencies.

We serve as a source of Education, Awareness, Direct Training Opportunities and Technical Support to all member Emergency Services throughout Canada, North America and the World.

TERC Canada is one of the organizations sanctioned by the Canadian Association of Fire Chiefs (CAFC), to demonstrate *Diversity in the fire service*, by recognizing and respecting the differences, needs, views and delivery models of the Canadian Fire Services to the public.

The International Association of Fire Chiefs (IAFC) use TERC Canada in an advisory/consulting role for their Technical Rescue Committee.

TERC Canada is a separate and functioning organization. We have considerable membership both Individual and Organizations/Departments from across Canada. We are a registered Canadian Charity with a duly elected executive, (Board of Directors) and several working committees. We have manufacturers and supporters of our goals and objectives who actively participate.

We provide the emergency services community with an opportunity to come together and share techniques and ideas in the field of vehicle rescue, by attending TERC Canada “Vehicle Rescue Challenges” and learning symposiums. These challenges ensure that emergency services personnel are exposed to rescuer and patient safety considerations, the latest extrication techniques, new innovations in extrication tools and up to date information on new vehicle technology.

TERC Canada is committed to:

- Reducing injuries and deaths of all Canadians involved in transportation emergencies.
- Enhancing the health and safety of all our emergency responders.
- Assisting all of our members in achieving those commitments in their local communities.

We need your help to continue this valuable work. TERC Canada offers a variety of options for support:

- A one time charitable donation. (Tax receipts will be issued on request or for all donations over \$20.00)
- A departmental membership. (Includes participation in a regional challenge plus access to all training materials on the TERC Canada website).
- A corporate membership. (Includes limited marketing/advertising opportunities)

Last year over 1.17 million people worldwide were killed in motor vehicle collisions. A further 35 million people were injured. The cost to the global economy is in excess of 518 billion dollars per year. The World Health Organization estimates that by the year 2020, road traffic injuries will be the third highest cause of death.

If you agree that our emergency service personnel deserve the best training possible, please complete the membership application below:
